

DAUD RAHIM

SOFTWARE ENGINEER | FULL-STACK & BACKEND DEVELOPMENT

Accra, Ghana | rahimdaud246@gmail.com

github.com/piccolojnr | linkedin.com/in/rahimdaud/

PROFILE

Software developer with practical experience delivering web applications and real-time dashboards. Builds with React, Next.js, Python/FastAPI and Laravel, with experience in database design, API integration, testing and production deployment. Seeking a remote software engineering role with ownership of useful, reliable products.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, C, SQL

Frameworks: React, Next.js, Laravel, FastAPI, Tailwind CSS

Databases: PostgreSQL, MySQL, Supabase

Tools: Git/GitHub, Linux, Docker, MQTT, Sanity CMS

EXPERIENCE

Software Engineering Intern | CSIR | 2024

- Developed a real-time noise-monitoring dashboard displaying sensor data received through MQTT.
- Implemented map clustering to make sensor locations and monitoring information easier to explore.

Corporate Website Development | KGL Group | 2024

- Implemented a multi-section corporate website from supplied Figma designs using Next.js, TypeScript, Sanity CMS and Tailwind CSS.

SELECTED PROJECTS

GNRF Grant Management System | Laravel

Developed the grant management component of a project delivered under a UNESCO contract through a contracting partner. Implemented identity onboarding, ORCID integration and submission controls.

INVVORA | Invoice & Receipt SaaS

Built document, payment and recurring issuance workflows with Supabase row-level security and a shared domain/SDK architecture.

ATE05 | Restaurant POS

Developed a Tauri desktop POS with order, checkout and kitchen workflows; implemented encrypted backups and Windows printer support.

EDUCATION & TRAINING

Knutsford University College | BSc Computer Science studies

ALX Africa | Software Engineering Programme | May 2024 - May 2025

Training in C programming, web development and software engineering fundamentals.
